## Reversible air/water heat pump

Cooling capacity 35,5 ÷ 148 kW – Heating capacity 42,31 ÷ 175 kW

- Water produced up to +65 °C
- Heating operations with external temperatures down to -20 °C
- Optimized for operation in heating mode

### DESCRIPTION

Reversible air/water heat pump for air conditioning systems with cold water production for cooling rooms and hot water for heating and/or domestic hot water services, suitable for connection with small or medium users. It's optimised for use in heating mode, and can be combined not only with low-temperature emission systems such as floor heating or fan coils, but also conventional radiators. Equipped with scroll compressors, axial fans, external coil with aluminium louvers, plate heat exchanger on the side. The base, the structure and the panels are made of galvanized steel treated with polyester paint RAL 9003.

### VERSIONS

**A** High efficiency  
**E** Silenced high efficiency

### FEATURES

#### Operating field

Working at full load up to -20 °C outside air temperature in winter, and up to 48 °C in summer. Hot water production up to 65 °C.

#### Version with Integrated hydronic kit

Integrated hydronic kit containing the main hydraulic components; available with various configurations to obtain a solution that allows you to facilitate installation.

#### Components

Water filter, flow switch, low and high pressure transducers as standard supply on all units.

#### Condensation control temperature

Fitted as standard with a device for electronic condensation control so that the unit can work even with low temperatures, adapting the air flow rate to the actual system request in order to reduce consumption.

### CONTROL

pCO<sup>5</sup> control type

Microprocessor adjustment, with keyboard and LCD display, for easy access on the unit is a menu available in several languages.

Adjustment includes complete management of the alarms and their log.

Possibility to control two units in a Master-Slave configuration

The presence of a programmable timer allows functioning time periods and a possible second set-point to be set. The temperature control takes place with the integral proportional logic, based on the water output temperature.

### ACCESSORIES

**AER48P1:** RS-485 interface for supervision systems with MODBUS protocol.

**AERBACP:** Ethernet communication Interface for protocols Bacnet/IP, Modbus TCP/IP, SNMP

**AERLINK:** Wifi Gateway with an RS485 serial port that can be installed on all machines or on all controllers having an RS485 serial port themselves. The module is capable of simultaneously activating the AP WIFI (Access point) and WIFI Station functions, the latter making it possible to connect to the home or business LAN both with VMF-E5 and E6. To facilitate certain management and control operations of the unit, the AERAPP application is available both for Android and iOS systems.

**AERNET:** The device allows the control, the management and the remote monitoring of a Chiller with a PC, smartphone or tablet using Cloud connection. AERNET works as Master while every unit connected is configured as Slave (max. 6 unit); also, with a simple click is possible to save a log file with all the connected unit datas in the personal terminal for post analysis.

**BMConverter:** The BMConverter accessory consists of the FPC-N54 network device which allows units that communicate via the Modbus RTU protocol on RS485, to be controlled by a third-party BMS system via the BACNet TCP-IP protocol.

**MULTICHLILLER\_EVO:** Control, switch-on and switch-off system of the single chillers where multiple units are installed in parallel, always ensuring constant flow rate to the evaporators.

**PGD1:** Allows you to control the unit at a distance.

**SGD:** Electronic expansion that enables connecting to the photovoltaic system and heat pumps to accumulate heat in the DHW tank or in the heating system during the photovoltaic production phase and release it at times when heating demand is highest.

**GP:** Anti-intrusion grid.

**VT:** Anti-vibration supports.

## FACTORY FITTED ACCESSORIES

**DRE:** Electronic device for peak current reduction.

**RIF:** Power factor correction. Connected in parallel to the motor allowing about 10% reduction of input current.

**T6:** Double safety valve with exchange cock, both on the high and low pressure branches.

**PRM1:** It is a manual pressure switch electrically wired in series with the existing automatic high pressure switch on the compressor discharge pipe.

**C-TOUCH:** 7", touch screen keyboard, which allows to navigate intuitively among the various screens, allowing to modify the operating parameters and graphically view the progress of some variables in real time.

**AERCALM:** The aim of the accessory installed in the electric box of the unit is to provide a clean contact for commanding - on the basis of the outside air temperature - a boiler to replace the heat pump. Aercalm must be requested at the time of ordering, as it is installed in the factory.

## COMPATIBILITY WITH VMF SYSTEM

For more information about VMF system, refer to the dedicated documentation.

- (1) Water produced up to +4 °C  
(2) The desuperheater must be isolated in heating mode. In cooling mode, a water temperature no lower than 35°C must always be guaranteed on the heat exchanger inlet.  
(3) As standard in sizes from 0350÷0700.  
(4) Standard for size 0200÷0330, without useful static pressure. Option for size 0350÷0700 with useful static pressure.  
(5) Option available only for size 0200÷0330.  
(6) Storage tanks with holes for supplementary heaters (not provided) are sent from the factory with plastic protection caps. Before loading the system, if the installation of one or all resistances is not expected, all plastic caps must be replaced with the special caps, commonly commercially available.

(2) Efficiencies for low temperature applications (35 °C)											

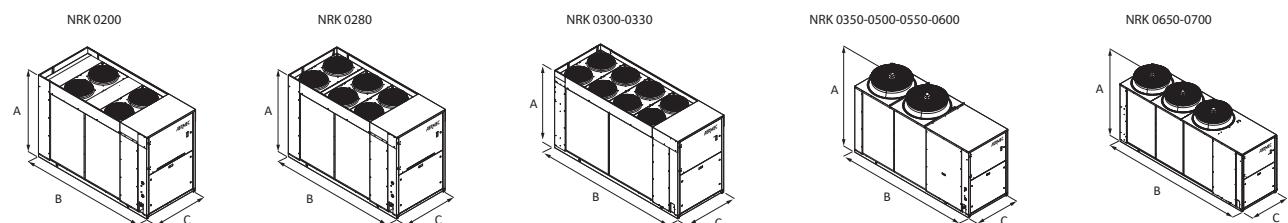

## GENERAL TECHNICAL DATA

Size		0200	0280	0300	0330	0350	0500	0550	0600	0650	0700
<b>Compressor</b>											
Type	A,E	type					Scroll				
Compressor regulation	A,E	Type					On-Off				
Number	A,E	no.	2	2	2	2	3	4	4	4	4
Circuits	A,E	no.	2	2	2	2	2	2	2	2	2
Refrigerant	A,E	type					R410A				
Refrigerant charge (1)	A	kg	-	-	-	-	23,0	28,0	29,0	39,0	40,0
	E	kg	14,0	16,0	16,0	16,0	23,0	28,0	29,0	39,0	40,0
<b>System side heat exchanger</b>											
Type	A,E	type					Brazed plate				
Number	A,E	no.	1	1	1	1	1	1	1	1	1
<b>Hydraulic connections</b>											
Connections (in/out)	A,E	Type					Grooved joints				
Sizes (in/out)	A,E	Ø					2½"				
<b>Fan</b>											
Type	A,E	type					axials				
Number	A	no.	-	-	-	-	2	2	2	3	3
	E	no.	4	6	8	8	2	2	2	3	3
Air flow rate	A	m³/h	-	-	-	-	37000	36500	36500	58000	58000
	E	m³/h	14000	20000	26000	26000	21100	21400	22400	31900	31900
<b>Sound data calculated in cooling mode (2)</b>											
Sound power level	A	dB(A)	-	-	-	-	82,0	82,0	82,0	83,0	85,0
	E	dB(A)	74,0	74,0	75,0	75,0	74,0	74,0	75,0	77,0	77,0
Sound pressure level (10 m)	A	dB(A)	-	-	-	-	50,1	50,1	50,1	53,0	53,0
	E	dB(A)	42,3	42,3	43,2	43,2	42,1	42,1	43,1	45,0	45,0

(1) The load indicated in the table is an estimated and preliminary value. The final value of the refrigerant load is indicated on the unit's technical label. For further information contact the office.

(2) Sound power calculated on the basis of measurements made in accordance with UNI EN ISO 9614-2, as required for Eurovent certification. Sound pressure (cold functioning) measured in free field, 10m away from the unit external surface (in compliance with UNI EN ISO 3744).

## DIMENSIONS
